RE: BROWN MARMORATED STINK BUG (BMSB), New Zealand

Dear Customer,

Please ensure that you've arrange BMSB treatment only with MPI's approved treatment providers at origin.

BMSB treatment certificate that not issued by MPI's approved service providers is not acceptable.

With regards the list of HS codes for High Risk Goods, please note that MPI NZ have taken a different approach to the Australian BMSB identification process, in that they have NOT issued a list of HS codes for us to work from, instead using the VMP (Vehicles, Machinery, & parts) descriptions below as the guide for the season.

- **Vehicles or machines ex schedule 3 countries must be treated at origin OR in Singapore where prior treatment by an MPI approved supplier was not completed:** Any vehicle or machine that has left the standard manufacturing logistics supply chain for testing, demonstration or other purposes must be treated. Includes non-working whole used vehicles or machines imported to be broken down and used for parts.
- **Vehicle and machinery PARTS ex schedule 3 countries must be treated at origin OR in Singapore where prior treatment by an MPI approved supplier was not completed:** Any accessories, attachments, components, devices, fittings, gear or parts such as chassis, engines, seating, panels suspension units, tyres and wheels on rims for all types of vehicles and machinery must be treated.
- **Machinery Definition:** Any mechanical device that modifies or transmits energy to assist in or improve the performance of work. The device may be drawn, fixed in position, pushed or self-propelled, electric or non-electric.
- **Vehicle Definition:** A vehicle is a mobile conveyance or machine which purpose is to transports people or cargo. Vehicles may be terrestrial vehicles (on-road or off road) or aircraft and watercraft.

List of BMSB risk countries (Schedule 3 of the Vehicles, Machinery and Parts IHS – updated 22 July 2019)

Albania	Japan
Andorra	Kosovo
